

# Pressure sensors

## Resin pressure related products

### CZ-200P

Rigid Stem Type  
Resin Pressure Sensor

#### Main Features

- Built-in thermocouple
- Various screw types (UNF, PF and M14/16)

### CZ-GP100

Flexible Rod Type  
Resin Pressure Sensor

#### Main Features

- Built-in thermocouple
- Accuracy of 0.5%

### HA930/430

Resin Pressure  
Digital Controller

The HA930/430 Series controllers are ideal to control resin pressure with its standard strain gauge input.

#### Main Features

- 0.025 sec (40Hz) sampling cycle time
- High resolution PID setting
- Max.2 loops (Temperature and Pressure control)
- 7 inputs and 5 outputs

### REX-PG410

Resin Pressure  
Digital Indicator

The REX-PG410 is pressure indicator for CZ-200P

#### Main Features

- Easy-to-read large LED
- 0.1 sec sampling cycle time
- Digital outputs (max.2)
- Digital communication
- Analog output

### AE530

Digital Indicator with  
24V DC Transmitter  
Power Supply

The AE530 is pressure indicator for CZ-GP100 with a built-in amplifier.

#### Main Features

- Easy-to-read large LED
- Digital outputs (max.2)
- Analog output

### PCT-300

Resin Pressure  
Output Converter

The PCT-300 converts signal from CZ-200P into analog signal.

#### Main Features

- Up to 4 analog outputs
- Linearization function
