Amplifier Built-in

Waterproof

The sensor can be hosed down because of its IP67 construction. The equipment on which the sensor is mounted can be washed without any problem.

Note: However, take care that if it is exposed to water splashes during operation, it may detect a water drop itself.

Robust

The enclosure is robust as it is made of die-cast zinc alloy.

Test input (emission halt input)

Convenient for operation check before start-up. (Excluding the **RX2** models)

The sensor operation is checked by interrupting the emission repeatedly and confirming that the output changes accordingly.

Automatic interference prevention function (Retroreflective and diffuse reflective type sensors only)

Two sensors can be mounted side by side because of the automatic interference prevention function. (Excluding the **RX2** models)

There is no problem even if the beam of the adjoining sensor is incident.
